Other

Description of Other Released Contaminant:

Inspected:

Written Report Received:

Clean Up Concluded:

Risk Evaluation:

No immediate risks were identified.

Areal Extent:

A portion flowed off site into adjacent cultivated field over an area of about 2 ft by 80 ft.

Potential Environmental Impacts:

Potential impacts include the surface soils of the well/facility site and the topsoil in the cultivated field to the north of the site.

Action Taken or Planned:

The contract produced water hauler is taking responsibility for this cleanup and was mobilizing a cleanup crew immediately after being notified and inspecting the site. The recommended action includes scraping up the impacted well/facility soils and hauling them off site to a permitted disposal facility. Clean soil will be used for replacement if necessary. Fidelity is currently discussing cleanup options with the landowner of the adjacent cultivated field.

Wastes Disposal Location:

Agencies Involved: BLM will be notified since this is a federal well.
